

Multi Room Audio

Listen to what you want, where you want, when you want.

SYSTEMS

Whether you are thinking about a wired or wireless system, we have systems to meet all your requirements. Brands we use include BlueSound, Sonos and Axiom

SOURCES

Select what music you want to play. Most sources can be integrated into your system, I-tunes library, internet radio, TV, FM radio or CD

SPEAKERS

Available for any environment, we aim to blend your speakers with the surroundings. If you want to listen to your music in the garden, by the pool, in the bathroom then give us a call to see what we can do for you.

If you have a fantastic music collection that you have built up, why not use it. Don't have it locked away where you need to find time to listen to it. Make it available to you anywhere in your home. Regardless of what format your music is, CD, PC, vinyl, I-tunes or if you listen to FM radio or internet radio stations. We can make a solution to suit you. We have ranges available that include wired and wireless solutions.

The take off of digital music services such as Spotify and Tidal now provides subscribers with access to a huge collection of music they can now share throughout the home. Such systems can be as simple as a single box ready to go in a few minutes.

We have speakers for all environments, weatherproof speakers for outside, or for damp areas such as bathrooms. Speakers can also be concealed to different degrees, from free standing speakers to ceiling speakers with low profile paintable grills, we even have speakers that imitate Gib, once painted they give no visual indication of a speaker!

Control of your audio sources and listening zones can be achieved numerous ways. Whether you want dedicated wall mounted keypads or control from a tablet our systems have "Apps" on both Apple and Android. If you are going to be including a home wide control system your Multi Room Audio can easily be incorporated to allow increased enjoyment.
